Even after a year, people are amazed when we tell them the Lueckes don't watch TV because we refused to fix the tube when it blew.

"But the Conventions, man," suggests an apparent avid viewer, "That's history in the making."

"That's history already made. Summer reruns are just as fresh as most of this convention fare."

"But doesn't Governor Reagan interest you, being a movie star and becoming California's governor and all?"

"Governor Reagan is stirring in helping a Notre Dame team 'get one for the Gipper' in the Story of Knute Rockne, a movie of the late '30s."

"But that's show business."

"So is modern politics."

"Which is on TV this week?"

"Not ours."

Russian is being offered in Yoe High School's program of "blackboard by wire."

This unique system of education is going into languages this year, after being introduced in some dozen or so Central Texas school systems last year.

Russian has become an important language of the sciences, just as German was before World War II, and French still is and English has become in diplomacy. Russian has become critical since Sputnik of 1957 and advent of space technology.

Of course, the Germans in the post-war era moved either to the U. S. or Russia and are recording their skills in the new languages.

Beside Russian, there are numerous courses in mathematics and other less exotic, but important fields.

The Cameron Independent School District, like these throughout Texas, awaits the full reports of the Governor's Committee on Education, part of which is already published.

The recommendations are far-reaching, even though it is said many of the recommendations are not new.

But things like blackboard by wire are only a beginning in an era of teacher shortages, social migration and tax considerations.

It is an unpleasant subject to most teachers, at whatever level, but ultimately the nine-month usage of public school buildings and faculty time will have to be stretched to at least 11 months.

But for a large part of the country, blackboard by wire is one of only numerous innovations education must accept if it is to survive the social demands placed on modern education.

INTERESTING — The \$50,000 to \$55,000 expansion budget on the Courthouse interior will be a credit in part on any downtown funds needed to match those \$650,000 Federal plus funds already committed. Would you call that solving two problems at once?

And if some are concerned about the City paving program, why don't they get some petitions for the paving to match those already in?

Dana Kestenbaum's house is happily over-run with daughters, son, sons-in-law and granddaughter but he claims he is getting plenty of rest. Has to go to sleep early to get a bed.

Dear Friends,

The Herald brings the good news today.

That changes in two of my old haunts are on the way.

The court house on the square and the First National Bank - I once worked there.

People need transplants and buildings do too.

(We old folks could use quite a few)

So the court and the bank I congratulate

On keeping Cameron up to date.

Your friend,

Hand Mangled

Woman Injured In Crash

Mrs. John Vrazel of Rt. 2 Buckholts remains in Scott and White Hospital following a two vehicle accident in Temple Monday. Mr. Vrazel was treated for minor injuries at Kings Daughters Hospital and released.

The Vrazels were injured when their pickup collided with a large tractor-trailer rig at North 3rd St. and Central Avenue, Temple, about

3 p.m. Monday. Mrs. Vrazel was thrown from the truck when the right door was sprung open by the impact. Apparently the truck ran over her hand, mangle her right arm. She also received minor head injuries.

The investigating officer told members of the family that seat belts in the Vrazel pickup would

have prevented any injuries. He said neither vehicle was traveling more than 10 or 15 miles per hour and Mrs. Vrazel would not have fallen from the truck if she had been secured in.

Joseph Leon Batliff of Hamilton was driver of the tractor-trailer. The truck was registered to Gerald Feed Mills of Hamilton.

'Number Please' Era Remembered

Mrs. Ruby Fogle traces her career with Southwestern Bell Telephone Company from "number please" to direct distance dialing.

Her 41 years, three months and 25 days with the telephone company were highlighted with a recent dinner at The Texan hosted by co-workers and friends.

Mrs. Fogle started work as an operator when Cameron had a telephone office force of about ten. That's when the district office occupied the second floor at First and Houston Streets, and the Cameron area exchange boasted about 700 subscribers.

Mrs. Fogle was promoted to chief operator in December 1928. It was an era when a long distance call was a matter of importance and if you weren't at your number, the operator often knew where to locate you.

Then came growth, a steady climb to over 2,000 telephone subscribers, and automation. New equipment meant a move to Temple for Cameron operators, and like many others, Mrs. Fogle commuted there daily until her retirement this month.

Telephone work is a family affair with the Fogles. They met when Valon Fogle was transferred to Central Texas with the telephone company and were married in the 1930s. He is installer - repairman in the Cameron office.

Tributes at the dinner included an orchid corsage presented by Mrs. Lottell Tanton, chief operator at Temple, a service emblem award presented by C. W. Thornton, district traffic superintendent at Waco, a billfold, life membership in the Telephone Pioneers of America presented by Mrs. Lucille Moore and life membership in Local 6206 Communication Workers of America presented by Mrs. Inez Holbert.

Gifts from friends, including a scrapbook, were presented by Miss Martha Joyce Schonerstedt and Mrs. Thelma Raney, and tributes to her service read by Mrs. Theresa Robinson and Mrs. Francine Snodgrass.

Dinner music for the 50 guests was provided by Max McClaren.

ORDINANCE DEFINES NEW SALES AREAS

Mayor E. A. Perrin Friday morning will head a contingent of Cameron civic leaders going to Dallas to study insurance programs with underwriters.

The trip is believed related to the industrial expansion program in North Cameron which involves a sprinkling system for an expanding Walled Lake Door Co. water service to a new building for Cam-Tex, Inc., a subsidiary of Sunny Isle Mfg. Co. of Dallas, which plans a 20,000-square-foot building for 200 or more employees, among other North Cameron prospects.

Perrin was unavailable at press-time for comment.

He announced plans at a regular City Council meeting Tuesday for the trip with Industrial Foundation President N. L. Caperton, Cameron insurance man James D. Camp and perhaps others, according to City Sec. Buddy Fuller.

In that two-hour Council meeting, the City Council approved a second and final reading of an ordinance prohibiting sale of alcoholic beverages within 300 feet of any Cameron church, public school or hospital.

The Council meeting was routine, Fuller told The Herald. City approval was granted for a parade August 10 in downtown Cameron, believed to be a Founder's Day parade for O. J. Thomas School.

Fuller said three mowers continued to operate every possible day in the city, clearing public right-of-way on streets and alleys and doing contract work for private individuals who are charged for the mowing.

Public Works Supt. J. B. Earle reported that gravel and asphalt patching and fogging continued in various parts of the city.

City Water Dept. reported one additional sewer and water connection in an otherwise routine week.

Two councilmen, R. W. Wells and John Hays were unable to attend the Tuesday Council meeting. Wells is on vacation and Hays is recovering from a series of heart attacks.

'Great American Amalgam' ...

First chapter of that great American amalgam of political inanity -- the Miami GOP National Convention -- is underway.

The Democrats' turn comes in a few weeks in Chicago.

It is so much show biz that the actors are now among the candidates: California Gov. Ronald Reagan, 20 years ago practically a paragon of the Left, now is a candidate of the Right and, incidentally, a GOP presidential nomination seeker.

Former Vice-President Richard Nixon should carry it off on the first ballot. He has some combination of about 600 delegate votes already counted, with 667 to nominate. New York Gov. Nelson Rockefeller now must compete prior to actual delegate voting with Gov. Reagan for those scattered, uncommitted delegates who might leave Nixon short on the first-vote ballot.

The GOP Party platform is "moderate", urging de-Americanization of the Vietnam struggle though Former President Eisenhower's piped speech emphasized need to rally purpose against

continuing Communist Asiatic power. Barry Goldwater loosened the first evening's convention with predictable attacks on the incumbent Administration and drew an ovation longer than Eisenhower's, who later suffered a heart attack.

Except for Ike's heart attack, this convention is much, too much like so many others: a package of predictability and a waste of energy for pre-determined nominations. We have seen it all before, and in Chicago, we shall see it all again.

There is a possibility, of course, that Rockefeller or Reagan could bog Nixon down, but it is as unlikely as McCarthy's stopping Vice-President Hubert Humphrey's nomination in Chicago.

Observers in Miami already are talking about Nixon's plans to go to Russia after nomination.

We would hope he and Hubert might first resolve this domestic problem, the political convention, which helped create them. And then go on to the business of getting elected.

P&W Commission Sets State Park Entrance Fees

By Vern Sanford

AUSTIN — Like the general cost of living, the price of outdoor recreation is going up for Texans. But the outdoorsmen will be getting more for their money.

However, the decision by the Texas Parks & Wildlife Commission to set entrance fees on 42 state parks did not mean an end to use fees.

In addition to a \$1 per car daily charge for entrance to 30 of the most developed parks in the state system and 50 cents per car for some others, Texans and out of state visitors still will pay use fees for campsites, shelters, recreation halls, cabins, lodges, swimming pools and for fishing piers at Copano Bay and Port Lavaca.

But the dual fee system was designed to serve a dual purpose. The entrance fees, which are expected to draw \$9 million over the 10 years beginning September 1, will be used to pay off principal and interest on the first parks improvement and acquisition bond issue by the Parks & Wildlife Commission.

Gov. John Connally, who urged the bond financing program, hailed the commission's action as the "opening step to bring a first class parks system within easy reach of every citizen of Texas." He said

the 10-year land acquisition program that is contemplated will more than double the 60,000 acres of park land and bring recreation facilities within easy reach of every major metropolitan area.

Last November, voters approved an amendment to the state constitution which authorizes the Commission to issue up to \$75 million in bonds to pay for the state's population growth. Sometime after Sept. 1 the Commission will issue \$3.75 million worth of bonds, and it will take about \$7.5 million to pay them off.

But the bond program can only apply to new parks lands. Initial development with bonds funds will be in a 120-mile radius of most of the state's 10 largest metropolitan centers.

Although PWC declined to state where the first funds will be spent, sources speculated that the initial developments may be at Velasco, Matagorda Island, Grapevine Reservoir, a five-mile "wild river" stretch along the Guadalupe River, White River Reservoir and in Jefferson County.

Under the entrance-fee plan, a family paying a \$1 per car entrance fee can go to as many \$1 and 50 cent parks in that day as they can and care to attend. But they could buy what Parks & Wild-

life Executive Director Robert Singleton considers a big bargain -- a \$12 a year pass to all parks. Annual permits will be acceptable in all facilities charging fees except San Jose Mission in San Antonio, Varner-Hogg Plantation and Eisenhower State Park where present fee schedules will continue. Swimming pool fees also will remain unchanged.

State Highway Commission looked to better recreational facilities, too, and approved new parks roads for Atlanta State Park and Caddo Lake State Park, as well as \$100,000 worth of "arbor projects" in 12 roadside parks along Texas highways.

LITTLE CHANGE
A subcommittee of the 25-member committee which is working on revisions of the Texas constitution has recommended to the full committee that closed sessions of the Texas Senate be abolished.

Texas' constitution now allows the Senate to lock its doors when it considers approval or rejection of persons nominated to state offices by the governor. Subcommittee headed by Rep. Dick Cory of Victoria voted down a proposal to allow 18 year olds to vote. Also, one to permit the Legislature to set up a permanent voter registration system. It did agree to retain the present

OLD PHILOSOPHER

Dear editor:
I was working on a idea for having Rural Free Delivery of my mail seven days a week instead of six out here on this Johnson grass farm and on all the other farms and ranches of the nation, when I read in a newspaper which temporarily feel out of my neighbor's mail box while he was plowing and which I have returned in just as good shape as when I found it and just before he got to the turn-row on this side—you don't hurt a newspaper by reading it—that there is some agitation for reducing city delivery of mail to four days a week as an economy measure and I figured I'd better hold up on my 7-day country plan for a more favorable time.

At any rate, the article went on to say that a committee of private business executives had made a study of the whole post office operation and had concluded the reason it was losing money is that it's not run on modern business principles, and the answer is to turn it over to a corporation under the supervision of the government.

"Like it's run now," the chairman of the committee said, "if the post office business was up for sale, nobody would buy it."

Now wait a minute. If the judicial system of this country was up for sale, would you want to buy it as an investment? The highway department? Congress? In fact, if the entire Federal government was up for sale, would you want to buy it? You want to buy a business that's a hundred and thirty billion dollars in debt and getting in deeper all the time?

Or getting closer to home, would you want to buy the state government? Or the... well, that's get-

system of legislative sessions every other year. Gov. Connally and Speaker Barnes, who appointed most of the members of the committee, both favor annual legislative sessions.

These decisions will go to the full committee, then to the Legislature, which will decide which of the recommendations, if any, are to be submitted to the people for a vote.

POLLUTION JUDGMENT
State of Texas has won a judgment for \$17,000 against International Minerals and Chemical Corporation of New York after taking the company to court for polluting the air over Houston. Corporation operates a barite plant.

This is the second pollution suit won by the state.

WELFARE REDUCTION
Some needy families with dependent children will be getting a reduction in state welfare aid effective September 1.

Reason is that a U.S. Supreme Court ruling that needy children are entitled to assistance even though there is an able-bodied man in the house will increase the AFDC rolls by an estimated 15 percent.

Welfare Commissioner Burton G. Hackney warns that unless the present \$60 million welfare ceiling is raised to \$75 million, as proposed in a constitutional amendment to be voted on in November, there will be even further reductions.

Families receiving a maximum grant of \$135 for four or more dependent children will get the biggest cut -- \$12 a month to \$123. Those now receiving \$124 will get a \$1 cut to \$123, those getting \$125, a \$2 cut, etc. In other words, 123

ting about as close to home as I ought to. We've all got to live around here.

The trouble is that some people just don't understand government. Take the post office department for example. It's like farming. It's a public service operation. It's not supposed to make a profit.

Yours faithfully,
J.A.

TRAIL OF FORTS

Governor and Mrs. Connally led a group of West Texans by bus on a 600-mile "Trail of Forts" through Central West Texas.

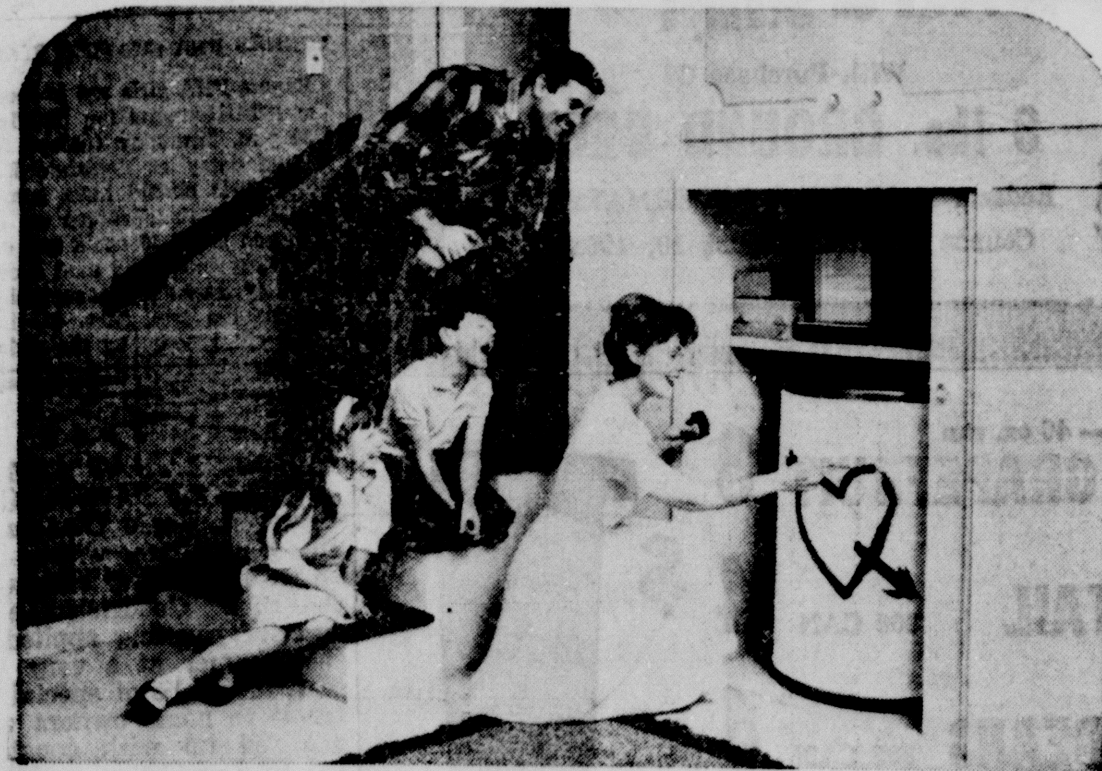

Purpose was to publicize the Forts Trail which takes travelers to many of the historic points in the area where the Indians made their last stand against the U.S. Cavalry.

Starting in Brownwood, the two-day tour included visits to Comanche, DeLeon, Mineral Wells, Jackboro, Albany, Abilene, Bronte, San Angelo, Eldorado, Menard, Mason and Brady. It is one of 10 travel trails designated by the governor.

BEPC Announces Expansion Plans

A five year building program, expected to exceed \$24 million was approved by the Brazos Electric Power Cooperative, Inc. Board of Directors, meeting Wednesday in Waco.

Board President E. D. H. Farrow of Itasca announced the expansion plans which include a new 100,000 KW generation unit at the recently dedicated Randle W. Miller power plant on Palo Pinto Lake near Mineral Wells, related substations, transmission lines and an expansion of the headquarters building in Waco.

The firm of Tippet & Gee has been retained to design and supervise construction of the power plant addition and a target date of 1972 has been set for its completion.

During the next five years, several hundred miles of 69 and 138 KV transmission lines will be added. The program also includes the addition of 24 new substations and capacity increases in numerous existing substations.

The first transcontinental air-mail route between New York City and San Francisco was started in 1920.

Grain Sorghum Varieties Tested

By J. D. Moore

Thirteen varieties of grain sorghum were planted as a variety test by Frank Kratochvil of Rt. 1, Cameron. The purpose of the test was to compare yields of the various hybrid grain sorghums.

The following varieties and yields adjusted to 13 percent moisture were: Pioneer 846, 5146 lbs.; Pioneer 845, 4998 lbs.; Tophand 4876; W.A.C. 690A, 4752 lbs.; NK 275, 4599; DeKalb c-44A, 4541; DeKalb c-44C, 4505; DeKalb C-44B, 4460; DeKalb F61, 4456; NK 222A, 4026; T.E. 56B, 4010; NK 265, 3754; and DeKalb C-42, 3532.

The average yield of the 13 varieties was 4113 pounds of maize per acre. The educational value of this test could be the fact that nine varieties were above the average yield and the top variety yielded the bottom variety by 1614 pounds of maize per acre. This difference in yield could be equal to the net profit derived from the crop.

Additional demonstration reports will be given as they are completed. These county crops tests were planned and carried out by the Milam County Field Crops Committee with Wilburn Beckhusen of Buckholts chairman of the demonstration work.

EARLY SOIL TESTING

Soil testing laboratories at College Station, Lubbock, Seymour, Nacogdoches and Wharton, ran tests on 3,284 soil samples during the months of April, May and June, reports Dr. C. D. Welch, Extension soil chemist at Texas A&M University.

County Agent's Notes ...

Grain Sorghum Varieties Tested

By J. D. Moore

Thirteen varieties of grain sorghum were planted as a variety test by Frank Kratochvil of Rt. 1, Cameron. The purpose of the test was to compare yields of the various hybrid grain sorghums.

The following varieties and yields adjusted to 13 percent moisture were: Pioneer 846, 5146 lbs.; Pioneer 845, 4998 lbs.; Tophand 4876; W.A.C. 690A, 4752 lbs.; NK 275, 4599; DeKalb c-44A, 4541; DeKalb c-44C, 4505; DeKalb C-44B, 4460; DeKalb F61, 4456; NK 222A, 4026; T.E. 56B, 4010; NK 265, 3754; and DeKalb C-42, 3532.

The average yield of the 13 varieties was 4113 pounds of maize per acre. The educational value of this test could be the fact that nine varieties were above the average yield and the top variety yielded the bottom variety by 1614 pounds of maize per acre. This difference in yield could be equal to the net profit derived from the crop.

Additional demonstration reports will be given as they are completed. These county crops tests were planned and carried out by the Milam County Field Crops Committee with Wilburn Beckhusen of Buckholts chairman of the demonstration work.

EARLY SOIL TESTING

Soil testing laboratories at College Station, Lubbock, Seymour, Nacogdoches and Wharton, ran tests on 3,284 soil samples during the months of April, May and June, reports Dr. C. D. Welch, Extension soil chemist at Texas A&M University.

Most of the samples came from

Uncontrolled Insects Take Bite Out Of Beef And Dairy Profits

Insect pests on beef and dairy cattle will do only as much damage as the producer allows, Phillip J. Hamman, Texas A&M University Extension entomologist, says. Blood feeders or "biting flies" have been giving ranchers more problems during this wet, insect-favorable weather, and fly control may insure more profit by reducing meat and milk loss, stopping disease transmittal and energy losses.

Horn flies are one of the most bothersome and prevalent insect blood feeders in Texas. Control measures for the horn fly depend upon good management practices. Fresh manure is the medium in which the eggs are deposited, and by keeping manure from collecting in the area, the pest can be partially controlled.

The horn fly is usually found in great numbers on the backs of animals, but on hot days the blood feeders will move to the belly, sides and face to escape the heat. Texas does not have trouble with the face fly, but horn flies which are on the face to be close to moisture from the nose and mouth are often mistaken for the face fly.

The "biting flies" also include such pests as the stable fly, horse fly and the common mosquito. The incidence of diseases such as pink-eye is many times increased because of the presence of these blood feeders on the faces of cattle.

Livestock insecticides used as wettable powders, soluble powders, ready-mixed pour-ons, emulsifiable concentrates, smears, dusts and aerosols can give temporary control of blood feeding insects, but the producer should be ready to re-treat animals when needed.

To control the bothersome pests, Hamman suggests using the recommended insecticides listed in MP-691, "Texas Guide for Controlling External Parasites of Livestock and Poultry."

Copies of the publication can be obtained at any county agent's office or by writing to the Department of Agricultural Information, Texas A&M University, College Station, Texas 77843.

WORSHIP IN CHURCH

and get a spiritual lift for the whole week

For Starving Souls

To build this church, that is our job." With Christ as foundation, this group of men have pledged to build...to make more pews available for neglected souls. These men are stewards of the Most High, armed with resolution to "build a church for His name," for starving souls. Every extra hour and every spare nickel goes into this responsibility entrusted to this company of Kingdom workers. These men are our neighbors. They are ministering to hungry souls...souls of boys and girls who need God. Souls of men and women whose wrecked bodies and warped minds need the healing, strengthening and comforting fellowship this church will give. Jesus said, "Take heed to the ministry which thou hast received in the Lord, that thou fulfill it." God's invitation to attend His Temples of Worship is addressed to you and yours. His invitation is eternal.

You Don't Say...

She is one of those women who BELIEVES in being prompt!

When you use the "one of" construction in a sentence, the relative pronoun and its verb are always plural.

Example:
She is "one of" those WOMEN who BELIEVES in being prompt. It is "one of" those APPLES which ARE juicy.

He is "one of" those MEN who DEFY regimentation. He is "one of" those MEN who RUN for every office.

Seasonal Vegetables High In Vitamin C

Many Texans have diets low in vitamin C. Mrs. Gwendolyn Clyatt, Extension consumer marketing specialist, suggests how to handle fruits and vegetables rich in vitamin C to retain their nutritive value and keep within the budget.

To keep costs as low as possible and have foods of top quality, buy items in season. Fresh grapefruit and oranges are excellent sources of vitamin C; they are in greatest supply in mid-winter. Stay within the budget by using turnip greens, mustard greens, collards, cabbage, green peppers, broccoli, cantaloupe, strawberries and canned tomatoes—all high in vitamin C—in menus. Vitamin C is easily destroyed, cannot be stored in the body, so include some of the foods high in it every day. Do not expose the foods unnecessarily to the air by chopping into small pieces and do not overcook them, says the Texas A&M University specialist. Use just the amount of water necessary for cooking crisp tender and don't throw any of the water or juices away.

An adequate amount of vitamin C in the diet helps you have general health and resistance to diseases.

"Let us have peace" are the words inscribed on the tomb of General Ulysses S. Grant in New York City.
